

Strategic Chemistry + Strategic Services

Connected Results

WHAT WE DELIVER

Integration of equipment and services, designed to deliver excellent and timely chemical cleaning results.

HOW WE DELIVER

Expertise. Integrated Execution. Efficiency.

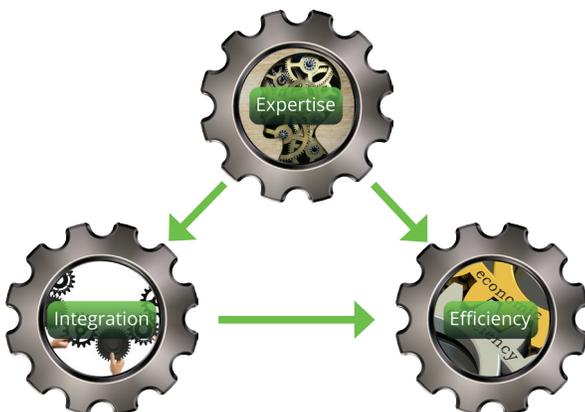

EXPERTISE

Leveraging RTI's depth of experience to optimize execution.

Designed for Application. Our mechanical rental equipment and services are specifically designed by RTI for vapor phase decontamination and cleaning applications with the flexibility to meet the most challenging turnaround demands and schedules.

Reliability. From exchangers, pumps, drain headers to vapor control solutions, our fleet of products and systems are designed and maintained to the highest quality standards to ensure your chemical cleaning milestones are achieved.

Safety, Health, and Environmental Control. When customized vapor control systems are combined with properly planned RTI chemical cleaning strategies, we can provide our clients up to 100% recovery or removal of VOCs, HAPs, and other unwanted contaminants.

INTEGRATION

Combining mechanical needs and chemical cleaning.

Planning. We provide more than just a price list. We design the entire system and drain header layout while coordinating with our Operations Team to support the chemical clean sequencing and timeline.

Project Execution. We can provide dedicated, on site Mechanical Coordinators to consult and support mobilization, set up, and demobilization.

Single Point of Contact. Our Operations Managers are the single point of contact to oversee chemical cleaning and mechanical needs, bringing problems to resolution quickly.

EFFICIENCY

Creating value and reducing project execution risk.

Minimize Resources. When combining Strategic Chemistry and Strategic Services, our client partners need fewer contractors and resources to manage, communicate, and execute a chemical clean project.

Minimize Delays. We specifically deploy vapor phase decontamination designs with contingency, so you don't have to. Our equipment is inspected and maintained to minimize failures and costly delays.

Minimize Cost. We are proactive in the reconciliation of invoices and communicating rental period in timelines in advance to minimize equipment costs.
